## TEST ENGINEER

**Location:** Wrocław, Tyniecka 17, Poland, (Temporary: remote)

**Your role:** Planning, designing and conducting device testing; writing test scenarios; implementation of automated tests; detection, analysis and reporting code errors, building and maintaining CI pipelines. As a test engineer you will be responsible for both manual and automated tests and overall quality assurance.

### Requirements:

- Bachelor or master degree in computer science or related fields – mathematics, physics, electronics and telecommunications, mechatronics
- Sound knowledge and commercial experience in test automation development
- Basic knowledge of C
- Advanced knowledge of Python
- Knowledge of Digital Signal Processing
- Basic electronic knowledge (understanding electronic diagrams, connecting hardware)
- Good command of spoken and written English
- Analytical skills
- Good team-worker
- Full-time availability

### Welcome:

- Real-time systems skills
- Knowledge of Jenkins and CI best practices.

### We offer:

- Stable employment in an international, reputable, fast growing company
- Real impact on architecture and technology stack in projects
- Supporting innovation and researching activity of employees (R&D days contracted)
- Friendly teamwork
- Currently - remote work, although occasional visits in the office will be required. In post-Covid reality – we provide comfortable office in modern building, play room, roof terrace, bike parking, showers, standing desks
- Private medical care
- Multisport card
- Group insurance
- Socializing events
